This will be the Web Hosting Site developed by John and should go live during late August 2009. It is our intention to provide good reliable hosting at a very reasonable prices. The hosting will be divided into three products - differentiated only by disk space and server throughput volume. We are planning to have a starter package from as little as \$4 US per month. This site is still under development, but please feel free to contact [John](#) if you would like to place an order in the meantime.

The reason we decided to offer hosting services is quite simple. Over the years that we have been creating web sites for our own businesses, we have been faced with a number of difficulties in obtaining good, secure hosting at reasonable prices, but without sacrificing any functionality and the ability to offer all the bells and whistles.

What do we mean by bells and whistles?

Well, things like unlimited FTP accounts, email addresses, sub-domains, MySQL databases, PHP scripting and a hole host of other items which we consider to be standard, but which some providers charge extra for.

Also included are CPanel accounts which make it easier to administer your web site, install software from included fantastico scripts, and look after your own email needs.

Please read our Terms and Conditions as soon as we have them up and running.

We are sure that you will find us real easy to get along with, and you will get what you need in terms of hosting. Our approach of providing a no frills low cost package will of course be

Welcome to BearServ Hosting
